

Online ordering for a pallet agreement

Customers can now **access and purchase from their pallet agreement** via the website. This step-by-step guide illustrates how.

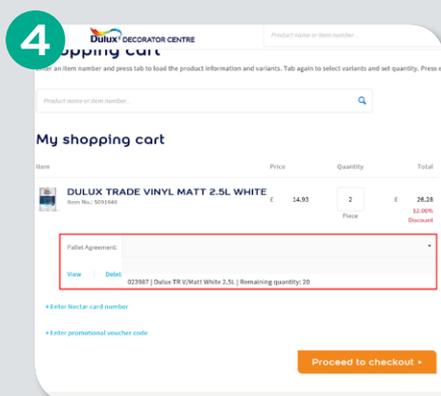

Customer logs into their **account** (if they are not yet registered go to the smart card for 'how to register')

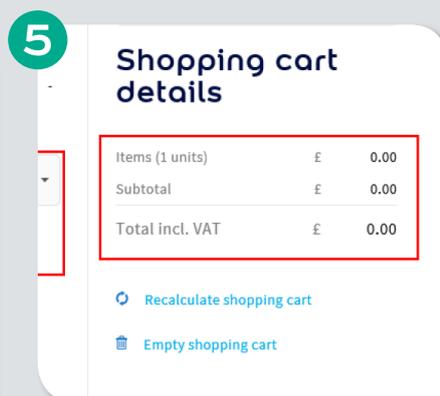

Customer adds all the desired items to their **basket**

And clicks the go to **basket button**

Customer selects the **pallet agreement** from the drop down box

The customer can see the value of the order has gone to **£0.00 to reflect the pallet agreement** and the 'Remaining quantity' has been reduced by the number of items ordered

The customer can then **continue to add other items** to the basket for both pallet agreement and normal sale items.
